# Transferring your ID from Onename to the Blockstack Browser

1. Download and Install Blockstack

If you have already installed Blockstack, skip to step 3, otherwise you will need to install the latest version of Blockstack here:
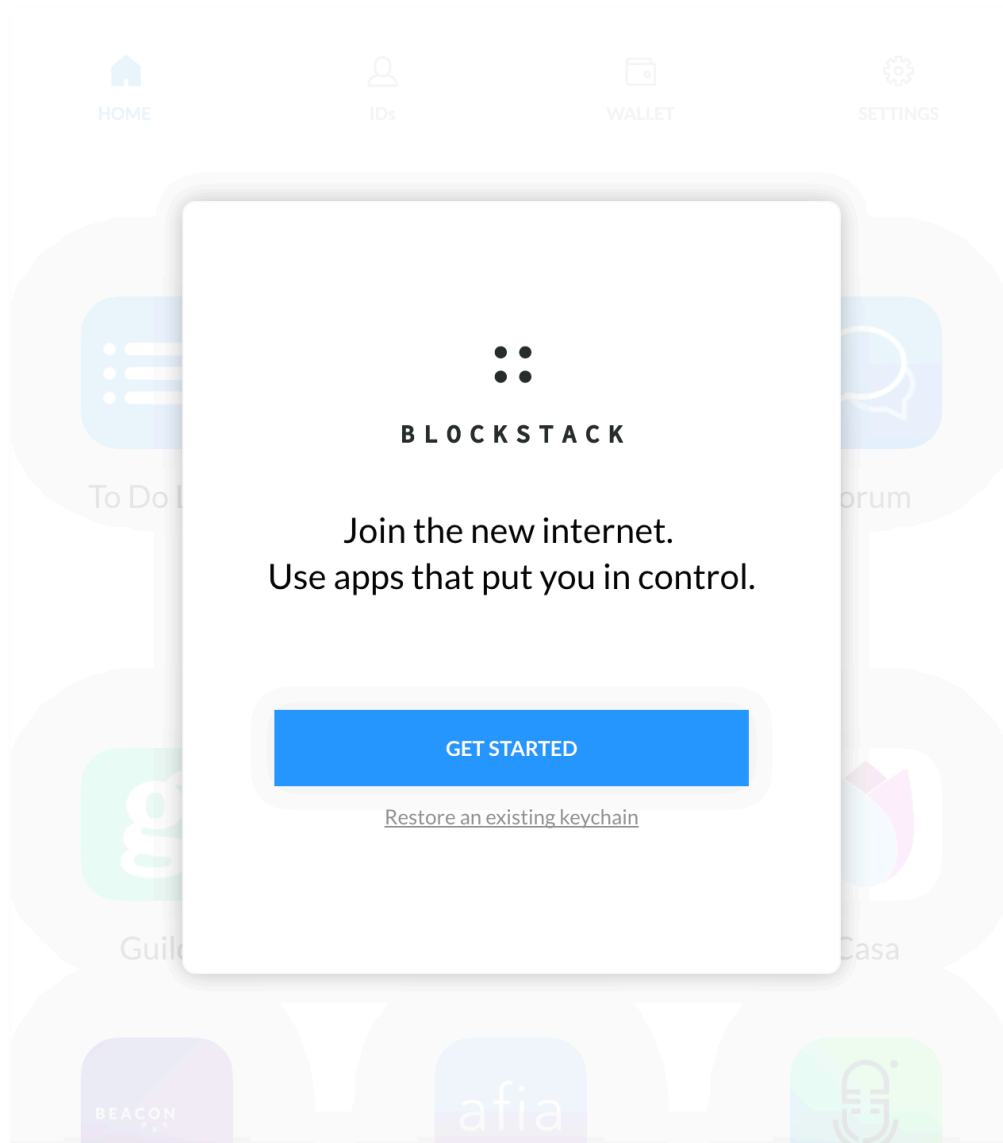

https://blockstack.org/install
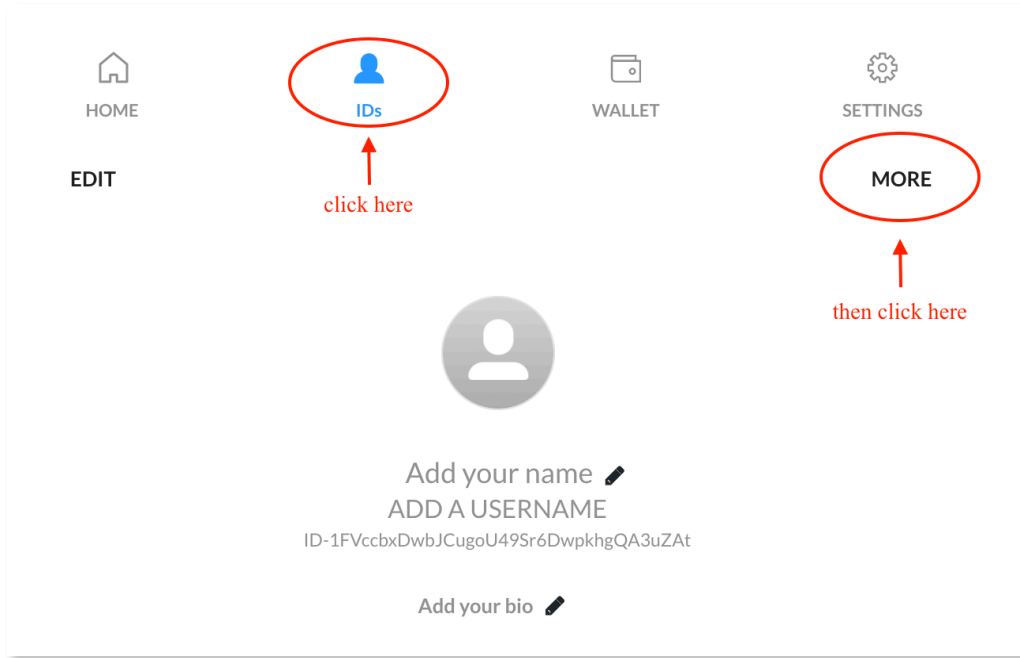

2. Go through Blockstack on-boarding process

Once you open Blockstack, you will be:

a. Asked to pick a new password to secure your identity.
b. Given a new identity key which you should write down and store safely
c. Asked to provide your email.
d. Asked to select a storage provider.

3. Begin name transfer process

a. Click on "IDs", then click "more".

b. Click the three dots in the bottom right corner of the box.

c. Then click "transfer username from Onename to this ID".

4. Sign in to Onename

Sign in to onename.com with your Onename email and password - **not** what you used for the Blockstack Browser.
